

SINCE 1952

Passion for Ammunition

9x19 Luger Ammunition Range, FMJ Projectile

Full metal jacketed projectiles of MFS work reliably in all pistol types and makes. The cartridges comply with the specifications of C.I.P. or NATO. Cost effective versatile round, perfectly suitable for both training and service purposes. Preserves the weapon's service life. Trusted by Law Enforcement & Armed Forces worldwide.

Please check our web site for further details and updates.

Caliber:	Projectile type:	Weight (g/gr):	Description:	Article Number:	Muzzle velocity (m/s):	Primer:	Reference:
9×19 Luger	FMJ	7.5/115	Training ammunition, especially suitable for outdoor shooting ranges.	2426476	375	Standard	C.I.P
9×19 Luger	FMJ	8/124	Training ammunition, especially suitable for outdoor shooting ranges.	2429192	355	Standard	C.I.P
9×19 Luger	TMJ	8/124	TMJ (encapsulated) projectile or training and service, especially suitable for indoor shooting ranges.	2426491	355	Lead Free	C.I.P
9×19 Luger	CLRN	8/124	Encapsulated round nose lead projectile with reduced smoke and emission.	2426474	355	Lead Free	C.I.P
9×19 Luger	FMJ-FP	10/154	FMJ flat point ammunition for training and service.	2426478	290	Standard	C.I.P
9×19 NATO	FMJ	8/124	The most popular FMJ ammunition according to NATO requirements.	2426494	385	Standard	AEP 97
9×19 NATO	TMJ	8/124	Pollution-reduced TMJ ammunition according to NATO requirements.	2430561	385	Lead Free	AEP 97

9x19 Luger Ammunition Range, Other Projectiles

Conventional full metal jacket projectiles cannot optimally meet the requirements of today's service ammunition for law enforcement and for sport shooters. Hollow point projectiles are more accurate than the FMJ versions where the low energy transfer causes over-penetration in soft targets way too easily.

Please check our web site for further details and updates.

Caliber:	Projectile type:	Weight (g/gr):	Description:	Article number:	Muzzle velocity (m/s):	Primer:	Reference:
9×19 Luger	Frangible SX	6.4/98	Non-toxic ammunition for tactical training with reduced risk of ricochets.	2426479	440	Lead Free	C.I.P
9×19 Luger	Target	8/124	Hollow point Target projectile with top accuracy, 25mm at 25 m.	2426482	350	Lead Free	C.I.P
9×19 Luger	JHP	7.5/115	Expanding jacketed hollow point projectile with top accuracy.	2426484	375	Standard	C.I.P
9×19 Luger	JHP	8/124	Expanding jacketed hollow point projectile with top accuracy.	2426485	355	Standard	C.I.P

About Us

MFS is a European small-caliber ammunition provider that delivers the best in class solution to accomplish your challenging missions.

Our main USPs

- Quality defense and law enforcement portfolio in small-caliber ammunition
- Trusted, responsive and solution-driven partner of choice
- Innovative and modern production systems

Our Mission

To provide high quality and reliable ammunition through well-proven manufacturing and businesses practices.

Our Vision

To be a quality ammunition supplier for the defense and law enforcement organizations worldwide.

Company story

Based on the heritage and the expertise of the Hungarian ammunition manufacturing dated back to “Magyar Fegyver és Lőszergyár Inc.” in 1881, our predecessor company “Mátravidéki Féművek Ltd”. was established in Sirok, Hungary in 1952. The focus was on supplying ammunition to the Hungarian military and law enforcement organizations during the cold war in the 1950’s. With the help of an additional investment to the factory, the production of new types of ammunition started to enter the sport and hunting market in the late 1950’s with the brand name of “MFS” (Mátravidéki Féművek Sirok – Matra Metalworks Sirok) and exported its product to more than 70 countries.

A major milestone was in the life of our company when RUAG Ammotec Group (ammunition producer of Geco, Norma, RWS, Rottweil and Swiss P brands) acquired the factory and the brand name in 2009. After the acquisition, it was integrated into RUAG’s German and Swiss systems by introducing top-notch technologies and processes in order to supply the premium brands of the group with pistol and revolver ammunition. We are able to manufacture ammunition according to C.I.P., to NATO and to the former Soviet/Russian standards.

Strict quality management, according to ISO 9001 and AQAP standards with regular audits and certifications, supervises the production. Our R&D unit is in line with the market trends and it makes sure that MFS is able to launch new products annually. One of our latest achievements is the high accuracy MFS pistol and revolver ammunition family.

RUAG Ammotec group decided to reintroduce MFS brand to be its main pillar to its dynamic expansion of its worldwide defense and law enforcement business with NATO standard ammunition.

Beretta Holding purchased the Ammotec Group from RUAG on 1st August 2022 including the Hungarian ammunition factory. The Hungarian based company in Sirok operates further under the name of MFS Defense Zrt. from this date.

MFS is a proud member of the Beretta Holding Group

MFS Defense Zrt.
